

Serial No.: 10/091,431
Atty. Docket No.: P67668US0

IN THE ABSTRACT:

Please amend the abstract as follows:

--~~Disclosed are a~~ A resin material supply apparatus and a method thereof ensuring the supply of a predetermined amount of resin material ~~to be supplied and the~~ and improved molding quality ~~to be improved without the need of storing many types of tablets or managing products by separation of damaged ones or by other methods.~~ This The resin material supply apparatus ~~comprises,~~ includes a weighing unit which allows a predetermined amount of resin material to be loaded into ~~each of~~ weighing pots, an agitating unit which ~~allows~~ receives the resin material ~~to be received from the~~ weighing pots into agitating cups ~~and permits for~~ agitation ~~to be performed by the rotation of each of~~ using rotating plungers ~~with an agitating rod protruded from the tip within cups,~~ a traveling unit which allows the ~~mentioned~~ agitating unit to travel back and forth ~~in the forward and backward directions in the space between the~~ ~~mentioned~~ weighing unit and a molding die by ~~a traveling motor capable of forward/reverse drive,~~ and a supply unit which permits resin material ~~having~~ which has been agitated and molten in the agitating cups to be extruded into a mold pot of the molding die by means movement of the ~~mentioned~~ plungers via a ~~vertical~~ vertically traveling motor ~~capable of effecting~~
